PROFILE

Frontend Developer and UI/UX Designer who helps SaaS startups and digital businesses turn Figma designs and product ideas into clean, responsive interfaces. Experience spans a full-stack product build — Veda, an AI-powered learning platform with a native mobile app and web admin dashboard — an independent real-estate website (Alurra Properties), and remote technical support work.

SKILLS & TECHNOLOGIES

Frontend	HTML & CSS, JavaScript, React, Tailwind CSS, Bootstrap, Kotlin & Jetpack Compose
UI/UX	Figma, Canva, Wireframing, User Flows, Responsive Layout Design
Development Tools	GitHub, VS Code, Android Studio
Other Technologies	Supabase, Vite, Recharts, Git
Support & Productivity	Freshdesk, Trello, Monday.com, Calendly, Slack, Outlook

PROJECTS

Veda — AI-Powered Learning Platform

Team Project · Final Year · Frontend Developer & UI/UX Designer

- Designed and built the UI/UX for a native Android student app (Kotlin, Jetpack Compose) covering onboarding, subject/level selection, a quiz engine, spaced-repetition flashcards, study plans, a Gemini-powered AI tutor, notes, and focus tools.
- Designed and built a 12-page React + Tailwind CSS admin dashboard for platform management — analytics, user management, question bank, and subscription billing — with dark/light theme support.
- Owned interface consistency across both platforms — layout, visual hierarchy, user flows, and a reusable component system.
- Collaborated with a team; the shared backend (Supabase) and AI systems were built as part of the wider team effort.

Alurra Properties

Independent Project · Frontend & UI Designer

- Designed and built a luxury real-estate website from the ground up using HTML, CSS, and JavaScript.
- Implemented 12 property listings, 5 agent profiles, and a responsive photo gallery lightbox — fully responsive from desktop to mobile.
- Live preview at alurraproperties.netlify.app, built to demonstrate high-end UI and frontend execution outside a team setting.

ADDITIONAL EXPERIENCE

IT & Remote Support

Remote Operations & Client Support

- Resolved customer support tickets using Freshdesk, maintaining timely and professional responses.
- Organized client tasks and workflows using Trello and Monday.com Kanban-style boards.
- Coordinated meeting scheduling and bookings for clients via Calendly.
- Collaborated with distributed teams and kept projects on track through Slack.
- Managed email correspondence and client inquiries via Outlook.

EDUCATION

Final-Year Student — National Institute of Information and Technology (NIIT)

Expected graduation: 2026
