PROFILE

Frontend Developer and UI/UX Designer focused on building responsive, intuitive digital experiences. Currently a final-year student, combining coursework with hands-on project work across web and mobile interfaces — including Veda, a collaborative AI-powered learning platform, and Alurra Properties, a personal real-estate website project, with some IT support related Jobs I handled.

SKILLS & TECHNOLOGIES

Frontend: HTML & CSS, JavaScript, React, Tailwind CSS, Bootstrap, Kotlin & Jetpack Compose

UI/UX: Canva, Wireframing, User Flows, Responsive Layout Design

Development Tools: GitHub, VS Code, Android Studio

Other Technologies: Supabase, Vite, Recharts, Git

Support & Productivity Tools: Freshdesk, Trello, Monday.com, Calendly, Slack, Outlook

PROJECTS

Veda — AI-Powered Learning Platform *Team Project · Final Year · Frontend Developer & UI/UX Designer*

- Designed and built the UI/UX for a native Android student app (Kotlin, Jetpack Compose) covering onboarding, subject/level selection, a quiz engine, spaced-repetition flashcards, study plans, a Gemini-powered AI tutor, notes, and focus tools.
- Designed and built the frontend containing multiple-page React + Tailwind CSS admin dashboard for platform management, with dark/light theme support.
- Owned interface consistency across both platforms — layout, visual hierarchy, user flows, and a reusable component system.
- Collaborated with a team; the shared backend (Supabase) and AI systems were built as part of the wider team effort.

Alurra Properties *Personal Project · Frontend & UI Designer*

- Built a static luxury real-estate website from the ground up using HTML, CSS, and JavaScript.
- Designed and implemented 12 property listings, agent profiles, and a responsive photo gallery lightbox.
- Currently live at alurraproperties.netlify.app; finalizing agent contact details before full launch.

ADDITIONAL EXPERIENCE

IT & Remote Support *Remote Operations & Client Support*

- Resolved customer support tickets using Freshdesk, maintaining timely and professional responses.
- Organized client tasks and workflows using Trello and Monday.com Kanban-style boards.
- Coordinated meeting scheduling and bookings for clients via Calendly.
- Collaborated with distributed teams and kept projects on track through Slack.
- Managed email correspondence and client inquiries via Outlook.

EDUCATION

Final-Year Student — *[(NIIT) National Institute of Information and Technology]*

Expected graduation: 2026
